## **8. Update on Organizational Relationships**

The Board of Directors finished Executive Session to discuss Update on Organizational Relationships.

## **9. Mojave Project**

<Mary McRae joined the meeting>

Laurent Liscia provided an update on the Mojave project. He noted that OASIS has been exploring working with Kavi Corporation to host the the OASIS Kavi system on the current Kavi 5. This would involve porting databases and configuring the system for OASIS. Another question is whether any software customization would also be required. OASIS needs to provide a summary of customization OASIS has made to the system to meet its needs.

The Board discussed the possible up-front costs of conversion as well as monthly operational costs, as well as risks and benefits. The Board also noted that it is important to focus on the high level needs.

The Board noted that as part of the action of reviewing the Kavi approach, Staff might wish to consider the following items: The need for essential features, gap analysis, avoiding non-essential features; aspects of a service agreement including uptime and other requirements; escape clauses (if Kavi discontinues supporting product etc); avoiding cost creep and cost management over long term; and managing change requests.

*<Greg Carpenter, Jeff Mischkinsky joined the meeting>*

Greg Carpenter, OASIS project manager, noted the need to separate the concern of maintenance of the current system (enabling hosted Kavi 5 to run it) versus designing a long term system with new requirements (Mojave). Greg Carpenter noted that OASIS is now revisiting assumptions of in-house development and operation. Work is progressing in determining requirements, determining completeness and sorting them into those for maintenance versus Mojave.

Board members agreed that the short-term Kavi maintenance project is different than the longer term Mojave project. Staff indicated that information needed for decisions related to Kavi maintenance should be available next week, enabling a decision by the next Board meeting. The Board agreed that a short-term maintenance project was urgent and asked the Executive Director to consider an approach to Kavi Corporation to provide a proof of concept that would demonstrate that platform's suitability for a short-term transfer and stabilisation.

Board members expressed encouragement of the direction Staff is taking and would like to hear a recommendation regarding Kavi maintenance as soon as possible.

*<Greg Carpenter left the meeting>*

## **10. Committee Note Proposal**

*<Robin Cover joined the meeting>*

Jeff Mischkinsky gave the Board an update on the Committee Note proposal, noting that the key concern is patent licensing obligations on Committee Notes (and that there is no disagreement on OASIS copyright). Board members noted that obligations are on normative portions. The revised TC Process proposal is at <http://lists.oasis-open.org/archives/board-agenda/201001/msg00004.html>.

Jeff Mischkinsky provided a position paper, see <http://lists.oasis-open.org/archives/board-agenda/201005/msg00013.html>. The Board also discussed comments from Jim Hughes, see <http://lists.oasis-open.org/archives/board-agenda/201005/msg00001.html>.

The Board discussed the possibility of a proposed IPR Policy change to limit the definition of Normative Portion, as given in

<http://www.oasis-open.org/apps/org/workgroup/board-plus/email/archives/201003/msg00054.html>.

MOTION 2010-05-26.08, Adopt Committee Note proposal from Jim Hughes on 30 March 2010 in <http://www.oasis-open.org/apps/org/workgroup/board-plus/email/archives/201003/msg00054.html>

MOTION 2010-05-26.08a (to amend), to substitute Change 1 by removing "developed as a Standards Track Work Product ", and adding to "with such deliverable" the text "and is marked normative".

Draft motion - no vote held

Also of note is that the TAB is drafting a best practices document for citations and has been heavily involved in Mojave project activities.
